

DSI Dantech strengthens global service with acquisition of GEA North American freezer service business and global appointment as preferred GEA service provider

As a strategic follow-up to DSI Dantech's 2024 acquisition of the North American freezer business of GEA for new freezers, we are pleased to announce the acquisition of the North American service business of GEA. This investment strengthens our ability to service the globally installed base of GEA freezers and extends our worldwide service capabilities.

DSI Dantech has signed an agreement to acquire the freezer service operations from GEA in the United States and Canada. This acquisition significantly enhances DSI Dantech's global service reach and establishes the company as the exclusive global service partner for GEA freezer technologies. The service business will officially be transferred to DSI Dantech on December 1, 2025. Until that date, GEA will continue to operate the service business under the GEA brand and structure.

Through this acquisition, DSI Dantech assumes responsibility for servicing GEA freezers in North America and welcomes the experienced GEA North American service team into its organization. The onboarding process will be completed by December 1, 2025, ensuring a seamless transition and continued high service quality for customers.

Global service for local needs

Beginning July 1, 2025, DSI Dantech will also serve as global service partner of GEA for freezer technologies outside North America. From that date, we will begin servicing the GEA installed base across the rest of the world. GEA has provided all relevant documentation, software, and tools to ensure that DSI Dantech can deliver best-in-class service worldwide. We will support all legacy GEA freezer brands and may engage specialized service partners where proximity or specific expertise is required.

"Our goal is to strengthen support for customers around the world — whether they operate GEA or DSI Dantech freezers," says Søren Overgaard, CEO of DSI Dantech. "With the addition of the GEA service team and design documentation, we are ready to ensure local responsiveness with global competence."

Aerofreeze® remains a strong brand

DSI Dantech reaffirms its commitment to the **Aerofreeze®** brand, continuing to support both new machine sales and aftermarket services. Customers can expect the same trusted performance and long-term value from their investments.

Serving all regions

With this expansion, DSI Dantech now supports freezer operations across all global regions—either through our own service centers or via certified service partners—ensuring professional, reliable, and timely service wherever needed.
